Pathogen Dispersal: Local Exchange vs. Wavefront Spread
A. Local D Matrix (D_P = 15 km)
B. Wavefront D Matrix (D_P^{wave} = 300 km)
C. Connectivity Comparison
Sink node (S→N)
Source node (S→N)
log₁₀(D)
Local (15 km)
med=13
Wavefront (300 km)
med=442
Number of nodes
Number of effective neighbors (weight > 0.01)
